

## STEERING WHEEL ADJUSTING LEVEL (mechanically)

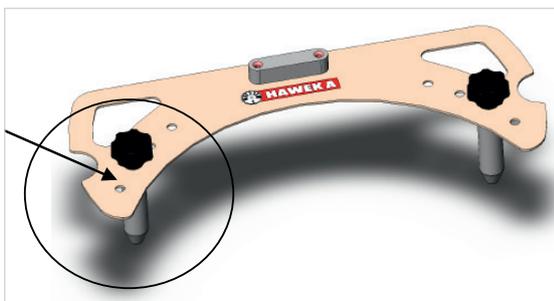

### Product description

The mechanical steering wheel level of HAWEKA is a special tool in alignment. It will facilitate the correct horizontal adjustment of the steering wheel.

This is very difficult because of the different arrangement of the steering wheels and dashboards .

With the mechanical HAWEKA steering wheel level, the correct positioning of the steering wheel is no problem. You avoid high costs of comebacks. Most of the comebacks regarding wheel alignment are steering wheels, which are not in the right position

**Part no. 921 001 000**

*The studs at the steering wheel level are adjustable. This makes it possible to use it at nearly all cars and trucks!*

*The adjustable tap on the spirit level is used on virtually all cars and light trucks.*
